The Greater Kanawha Valley Foundation
2021 Grantee Perception Report

"TGKVF is an organization that seeks to make partnerships and connections in the community. They aren’t just there to give money to a particular project or need. They are focused on meeting longer-term needs, and how their resources may be a part of the solution."

Community resources are assets in a community that help meet certain needs for those around them. These assets can be people, places or structures, and community services. This website serves as a repository for community development resources and includes resources in arts and culture, basic needs, education, and health.
